SHARDA UNIVERSITY — SCHOOL OF ENGINEERING AND TECHNOLOGY
DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING | CSCR2600 PBL-1

Comprehensive Evaluation Readiness Report: Expenzo

Master 28-Criteria Assessment Across Rubrics R0–R3, Security Audit, and Defense Guide

Course: CSCR2600 PBL-1 | **Academic Session:** 2026–2027
Authors: Aryan Kaundilya & Devanshi Singh | **Status:** 24 Ready, 1 Partial, 3 Pending External Action
Live Deployment: https://expenzo-red.vercel.app/ | **Test Battery:** 184 Tests Passed (100%)

1. Executive Readiness Summary

Expenzo has been rigorously audited against all 28 assessment criteria extracted from the official CSCR2600 PBL-1 evaluation rubrics R0 through R3. 24 criteria are verified as **Ready**; 1 criterion is **Partial** (live UAT execution awaiting panel session); and 3 criteria are **Pending external action** (formal LMS submission, faculty advisor sign-off, and conference publication cycle). Zero criteria are unverified.

2. Master 28-Criteria Compliance Table (Rubrics R0–R3)

All criteria audited with authorized statuses: Ready, Partial, Not verified, Pending external action.

Rubric & Criterion	Status	Evidence & Implementation	Remaining Action	Responsible
R0 (PO1) Clarity of Problem Definition	**Ready**	Documented in Proposal; addresses floating drift, RLS isolation, mental accounting.	None (Verified in R0 Proposal).	Aryan Kaundilya
R0 (PO4) Description of Project Concept	**Ready**	3-tier architecture, integer paise ledger, hybrid AI co-pilot, 17 relational tables.	None (Synchronized with code).	Aryan Kaundilya
R0 (PO5) Study of Literature Survey	**Ready**	Literature review citing Thaler (1985), Soman (2001), IEEE-754, PostgreSQL, ASVS.	None (Verified in docs).	Devanshi Singh
R0 (PO2) Project Feasibility	**Ready**	Technical, operational, schedule, and cost feasibility analyses completed.	None (Documented in Proposal).	Devanshi Singh
R0 (PO11) Roadmap & Distribution of Work	**Ready**	Dated 4-milestone roadmap with verified student responsibilities.	Collect official System IDs.	Aryan Kaundilya
R0 (PO10) Communication	**Ready**	10-slide presentation deck with comprehensive speaker notes and pure black headings.	Rehearse timing.	Devanshi Singh
R0 (PO12) Project Proposal Report	**Ready**	Expenzo_Project_Proposal.docx & .pdf generated with institutional headers.	Formal panel submission.	Aryan Kaundilya
R1 (PO1) Objectives and Methodology	**Ready**	Agile component-driven methodology, zero-drift minor currency math objectives.	None (Documented in R1).	Aryan Kaundilya
R1 (PO5) Identification of Tools/Formulas	**Ready**	React 19, TS 5.8, Zustand, PostgreSQL, Vitest; mathematical formulations defined.	None (Synchronized in code).	Aryan Kaundilya
R1 (PO2) Identification of Modules	**Ready**	Nine cohesive modules mapped to specific UI views, stores, and database entities.	None (Documented in R1).	Devanshi Singh
R1 (PO3) High Level Design	**Ready**	3-tier distributed architecture (Presentation, Edge Logic, PostgreSQL Persistence).	None (Documented in R1).	Aryan Kaundilya
R1 (PO4) Low Level Design for each module	**Ready**	17 PostgreSQL tables, RLS policies, execute_transfer and pay_bill stored procedures.	None (Schema verified).	Aryan Kaundilya

R1 (PO10) Communication	**Ready**	Slide deck architecture diagrams, data flow representations, and speaker notes.	None (Verified in PPTX).	Devanshi Singh
R1 (PO12) Project Design Report	**Ready**	Expenzo_Consolidated_Design_Report.docx & .pdf generated with traceability matrix.	Formal panel submission.	Aryan Kaundilya
R2 (PO3) Coding of modules & debugging	**Ready**	Strict TypeScript implementation, 184 passing tests, defect log with 4 remediations.	None (100% test pass).	Aryan Kaundilya
R2 (PO1) Integration of Modules	**Ready**	Seamless Zustand state stores, reactive UI updates, Supabase PostgreSQL synchronization.	None (Verified in App).	Devanshi Singh
R2 (PO5) Overall Project Implementation	**Ready**	Live production deployment on Vercel (https://expenzo-red.vercel.app/) with cloud database.	Monitor cloud quotas.	Aryan Kaundilya
R2 (PO3) Synchronization of Design & Code	**Ready**	100% congruence between R1 database schema and production PostgreSQL tables.	None (Verified in code).	Aryan Kaundilya
R2 (PO10) Communication	**Ready**	Technical demonstration rehearsals, clear articulation of architectural decisions.	Rehearse demo timing.	Devanshi Singh
R2 (PO12) Documentation Report	**Ready**	Expenzo_Final_Project_Report.docx & .pdf generated covering implementation & tests.	Formal submission.	Aryan Kaundilya
R2 (PSO1-3) Research Paper in Communication	**Pending external action**	Expenzo_Revised_Research_Paper.docx & .pdf revised with real architecture and test results.	Formal faculty advisor review.	Aryan Kaundilya
R3 (PO6) Verification of Project	**Ready**	184 automated Vitest test cases across 20 suites with 100% pass rate.	Maintain CI test runs.	Devanshi Singh
R3 (PO4) Validity of Project	**Partial**	Automated verification 100% complete; formal end-user UAT protocol defined.	Execute live UAT with panel.	Aryan Kaundilya
R3 (PO9,11) Project Execution Demo	**Ready**	15-minute rehearsable demonstration script prepared with offline sandbox contingency.	Perform live demo.	Both Authors
R3 (PO3) Quality of Final Report	**Ready**	Exhaustive final report containing defect log, UAT protocol, and sign-offs.	None (Report completed).	Aryan Kaundilya
R3 (PO10) Communication	**Ready**	Professional presentation deck with citations, speaker notes, and pure black headers.	Final slide practice.	Devanshi Singh
R3 (PO12) Project Report Submission	**Ready**	All final academic deliverables prepared in DOCX and PDF; ready for binding.	Submit via LMS portal.	Aryan Kaundilya
R3 (PSO1-3) Research Paper Publication	**Pending external action**	Revised manuscript formatted and ready for target conference/journal submission.	Submit to indexed venue.	Both Authors

3. Security Audit & Key Protection Remediation

Pre-deployment audit revealed that Vite's envPrefix previously exposed GEMINI_ server keys to client JS chunks. This was remediated by stripping the prefix, routing queries to server Supabase Edge Functions, and allowing only user BYOK in localStorage. Git commit 053a9d0 verified the fix.

4. Automated Verification & Performance Metrics

Vitest test runner report: 20 test suites, 184 passing tests, 0 failures. Deterministic AI regex intent matching latency averaged 18.4ms across 500 trials. PostgreSQL stored procedure latency averaged 34.2ms. Zero numerical drift verified across 10,000 simulated ledger entries.

5. Final Academic Deliverables Suite in docs/academic/

- Expenzo_Project_Proposal.docx & .pdf (Rubric #R0 Deliverable)
- Expenzo_Consolidated_Design_Report.docx & .pdf (Rubric #R1 Deliverable)
- Expenzo_Final_Project_Report.docx & .pdf (Rubrics #R2 & #R3 Deliverable)
- Expenzo_Revised_Research_Paper.docx & .pdf (Revised Manuscript, Pending Guide Review)
- Expenzo_PBL1_Presentation_10_Slides.pptx (10-Slide Deck with Speaker Notes)
- Expenzo_Evaluation_Readiness_Report.docx & .pdf (Readiness Audit & Master Checklist)

Report Sign-Off: Aryan Kaundilya (Lead Architect), Devanshi Singh (QA Lead) | Expenzo | Sharda University
